

## City News In Brief

(From Thursday's Daily)

### From the Farm.

Charles Young, the Ferguson valley farmer, was in the city yesterday on business and reports that dry farming region as coming to the front as a heavy producer.

### Business Trip.

Ralph W. Watson, engaged in the real estate business of Los Angeles, arrived in the city yesterday to remain for several days and is a guest of C. A. Peter, Jr., clerk of the board of supervisors.

### Leaves for New Home.

Mrs. S. B. McAuley, who has been residing at McCabe with her mother, Mrs. T. H. McCarthy, arrived in the city yesterday and will leave today for Bakersfield, Cal., where she will reside in the future.

### Engineer Leaves.

Gus Schraplau, one of the best known mechanical engineers in this section, left yesterday for the camp of the Frisco Mines and Power company, near Kingman, where he has accepted a responsible position.

### Returns From East.

Mrs. M. V. Watson, wife of the general manager of the Prescott Gas and Electric company, returned yesterday from an extended visit with relatives and friends at her former home in the state of New York.

### Leaves for New Home.

Mrs. Roy Wager and child left yesterday for Bisbee, where her husband is an employee of the Copper Queen Mining company in the mechanical engineering department. Her departure is regretted by many friends and acquaintances.

### Visiting the Mines.

City Assessor Frank Williams has gone to the Bradshaw mountains for a few days to make an examination of development on the Ingersoll mines, in which he is interested. The property is more familiarly known as the old Tucumbia, and in early days was among the bonanza silver producers of that section.

### Returns From Coast.

J. T. Sheffield, general manager of the Puntenev Lime company, returned yesterday from a business trip to the coast, and states that his wife and son will reside for the winter at San Diego, the change in climate being taken for the benefit of the poor health of the latter.

### Won Blue Ribbons.

The two high class mules of Geo. C. Ruffner, that were awarded first prize at the recent territorial fair, were brought from Phoenix yesterday decorated with blue ribbons. They are pronounced the finest type of their breed in Arizona, and attracted much attention among live stock growers in the capital city. Both are jet black and well mated even to distinctive marks which show their high class breeding.

### Receives Sad News.

Edward Silker, who is mining in the Date Creek range of mountains, left yesterday for Raleigh, N. C., receiving the sad news that his brother, Wilbur W. Silker, had passed away late last week. The latter was a visitor to this section for several months and his health having improved he returned home under the belief that he was well. A recurrence of his asthmatic affliction followed, when death resulted in a few days and while he was making preparations to return to this country.

(From Friday's Daily)

### Leaves for the Winter.

Miss Josephine DeKuhn, of Cherry Creek, left yesterday for Phoenix, where she will spend the coming winter with friends.

### From the Hassayampa.

Ed. Parsons, the mining man of the Climax section, was in the city yesterday after supplies for his camp, and reports much activity going on. The recent mill run on Climax ores was very satisfactory, and the property is regarded as one of the coming great gold producers of the county.

### New Minister Arrives.

Rev. and Mrs. W. L. Whisnaut arrived from Los Angeles, yesterday to reside. The former has been appointed to fill the pulpit of the Methodist Episcopal Church South at the recent conference of his denomination, held in San Diego. He succeeds Rev. I. P. McKay, who has been assigned to another field.

## AVIATOR RODGERS RICH ORE FOUND HAS STRANGE SLEEP IN SOUTHERN YAVAPAI

(From Saturday's Daily)

PASADENA, Cal., Nov. 17.—Aviator C. P. Rodgers, who narrowly escaped death on Sunday while attempting to complete his ocean-to-ocean flight, when he fell in an open field south of Compton, today is resting easy and expects to be out in two or three days.

He grew reminiscent as he lay in bed, puffing a long black cigar. His mind seemed much clearer today, and he remembered his feelings just before he fell.

"It was the ethereal somniphetic," he said, "that caused the accident. That is, a sort of drowsiness overcame me. It's in the air. It caused the deaths of Ralph Johnstone, Arch Hoxey, Eugene Ely and many others. It is something not unlike the odor of chloroform, and gradually lulls the aviator into unconsciousness and then comes the fall to the earth."

"I was about 1500 feet in the air when I felt a strange feeling creeping over me. I must go to sleep. I felt as if the machine must take care of itself. I tried heroically to stall off the feeling, and I shut off the engine and started to glide to earth. The nearer I got, the stronger the sense of sleepiness."

"Finally I lapsed into unconsciousness, the planes fell from my hand, the machine became unmanageable, and down I came."

"I know it's the same thing that caused the deaths of the other boys. They were much higher than I when they felt it. They started for the earth, but as in my case, the nearer they came the more overpowering the terrible thing became until, losing all consciousness, they fell."

"I cannot describe it further, than to say that when once it seizes an aviator, he is sure to be a victim. I believe I am the only man who ever came through it alive."

Rodgers says he will complete his flight on Tuesday.

## GLOBE MAY SOON GET NEW MILL

GLOBE, Ariz., Nov. 14.—D. C. Jackling, the well known and successful mining promoter, Charles Hayden of the firm of Hayden, Stone and company, brokers of Boston, and a party of mining magnates, are expected to arrive this afternoon by machine from Phoenix. They were expected to arrive here last night but they stopped a day longer at the fair than they had planned on.

Mr. Jackling, as well as Mr. Hayden, are very well known here and their arrival is looked forward to with great expectations by all the mining men in this section of the country.

There is very little known as to the purpose of their visit here, but it is thought by many that they are to select the site for the new mill of the Inspiration Copper company. This selection is of very great importance to Globe, because if the mill is built here it means a big increase in the finances as well as in the population of the city.

The selection of this site was decided upon several times, but countermanded, and it is hoped that now the decision will finally be made in favor of Globe.

## THIS LADY'S GOOD APPETITE

Mrs. Hansen, in a Letter From Mobile, Tells How She Gained It.

Mobile, Ala.—"I suffered for seven years, with womanly trouble," writes Mrs. Sigurd Hansen in a letter from this city. "I felt weak and always had a headache and was always going to the doctor. At last I was operated on, and felt better, but soon I had the same trouble."

My husband asked me to try Cardul. I felt better after the first bottle, and now I have a good appetite and sleep well. I feel fine, and the doctor tells me I am looking better than he ever saw me."

If you are sick and miserable, and suffer from any of the pains due to womanly trouble—try Cardul. Cardul is successful because it is composed of ingredients that have been found to act curatively on the womanly constitution.

For more than fifty years, it has been used by women of all ages, with great success. Try it. Your druggist sells it. N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment of Women," sent in plain wrapper, on request.

(From Saturday's Daily)

Reports from the Rattlesnake mine, near Walnut Grove, an old time location on which development was resumed a short time ago by T. J. Cox and J. A. Burlington, place that property among the coming big producers. Since the old workings have been cleaned out new ore bodies have been exposed. In the main shaft an 18-inch vein of oxide of iron ore has been developed that carries values of \$40 in gold, while samples cut from four feet of the sulphide and red oxide of copper show values of four and one-half ounces in gold and eight and one-half per cent in copper.

The owners are energetically developing the property and feel sure of the future, since striking the above rich ore bodies. The gold will be extracted by asastras, while the sulphides will be shipped to a smelter for treatment. The property is attracting much attention in that section among miners who have seen it.

## BRADLEY STARTS WORK ON MINE

(From Saturday's Daily)

Following the reorganization of the Arizona Mines company, effected a few days ago in Phoenix, operations have been resumed, and Mark Bradley, general manager, has gone to the camp to resume development. An amicable adjustment of all interests was made, and the property is to be operated on a much larger scale than formerly.

The property of this company is situated near Constellation and during the temporary suspension pending an adjustment, only a few miners have been kept at work. The main shaft has reached a vertical depth of 400 feet, and the property is reported by Mr. Bradley to have a good showing for the amount of work done. The outlook is good for making a heavy producer.

## WATER STORAGE PROJECT IS ACTIVE

(From Wednesday's Daily)

Arrivals from Walnut Grove yesterday stated that Luther Wagoner, chief engineer of the Walnut Grove Water Storage company, with his assistant, George Harbauer, have taken up their residence at the old headquarters building at the upper damsite, and the surveying of a wagon road to connect the camp with the county road has been started. The new road will be one mile in length and fifteen men are employed.

Rumors were also in circulation that the movement is regarded as the forerunner of resuming work on that great water storage project, while the company officials maintain that the building of the roadway is this year's method of performing annual assessment work, the highway passing over lands that are owned by the company. At any rate, residents of Walnut Grove are very much interested in what is being done, which they say is a very significant and radical departure this year from what has heretofore been the method of maintaining title to the property.

## ONE DEMOCRATIC CANDIDATE RESIGNS

(From Friday's Daily.)

G. H. McNish, nominated at the primary election on the democratic ticket for the office of county school superintendent, refuses to make the race, as the following telegram will show:

"Tarrytown, N. Y., Nov. 16.—To C. A. Peter, Jr., clerk of the board of supervisors, Prescott, Arizona: With regret I resign the democratic nomination for county superintendent of schools."

(Signed) "G. H. McNISH."

Mr. McNish left this county last June, and had been employed in the Jerome high school for one year preceding that time. His name does not appear on the great register, and for this reason if he had been elected he could not have qualified, is the statement made by legal authorities.

## STRIKES STRONG FLOW IN SAN SIMON WELL

SAN SIMON, Ariz., Nov. 16.—A flow estimated at 200 gallons per minute is the result at the artesian well of the Globe Water and Irrigation company two miles northwest of San Simon, after perforating the casing. The water is soft and pure, and has a temperature around 85 degrees F, which is ideal for irrigation purposes.

The company which is composed of prominent Globe men, including F. F. Towle, president of the Globe chamber of commerce, Sam. L. Gibson, president of the Gibson Copper company and others, is well pleased with the result and has let a contract for the drilling of three more deep wells.
